WIN WIN

NAME OF OUR PROJECT : WIN WIN

AUTHORS :

1. Mehak Aggarwal
2. Shreya Kumari
3. Anya Anand

INTRODUCTION :

A country's economy defines its development and growth. India's economy is considered one of the most diverse ones. For instance, in the state of Mumbai you would find the richest of people and at the same time millions of impoverished children suffering from malnutrition in the slums. Hence, we have developed this app for those, who do not get what they deserve.

PROBLEM PROJECT AIMS TO SOLVE :

Our project aims at giving opportunities to those who are underprivileged and are not able to get into colleges. Our prototype gives them the chance to showcase their skills and also support them financially. They can get the exposure they require to get into good companies of their respected fields. Our app does not bound to only one profession, all the professions are welcomed. They do not need any previous experience but only knowledge in their respective fields.

DETAILS OF THE PROJECT :

Just like any other app, we have the basic log in / sign up page for both employers and employees. For employee we ask for some extra details, so that our employers do not get scammed. We ask for their Aadhar number, profession details and to upload their resume. Aadhar number will not be revealed to anyone. After the account is created it will be available for the employers to see.

There is a home page which will show our best and the highest rated employees. We have separate pages for each profession and employee for the employer to select from. This page will even show the reviews of the particular employee and about their previous projects. There is a separate page for the employee to see their profile and pending work.

Our project helps both the employee and employer. It is like a winning situation for both the parties, hence named 'WIN WIN'.

FUNCTIONING OF THE PROJECT :

1. The first page of our app is the log in / sign up page.

2. Flow 2 is for the employees.

3. Flow 3 is for the employers.

4. You can select whether you want to sign up or log in.

5. If you are an employer, after selecting log in option, the main page will appear.

6. If you are an employee, after selecting log in option, your profile page will appear.

7. If you are an employer, select sign up, a 'sign up' page will appear. After filling the details and clicking on sign up sign you will be sent to our main page.

8. If you are an employee then after filling the sign up page the details page will appear.

9. After filling up the details, the page that will show your profile will be created and will appear on you screen.
